

Summer 2014 Quarterly

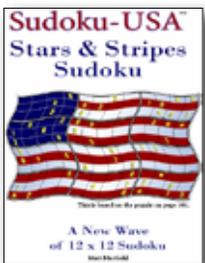

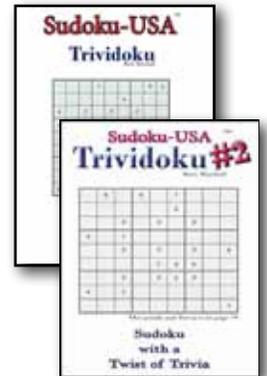

Welcome to the Summer 2014 quarterly where we have a mix of new puzzles for you, some in new styles we're trying out and some in our classic Sudoku variation forms.

Enjoy!

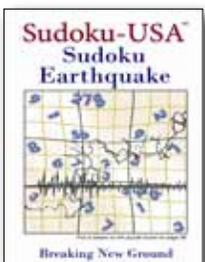

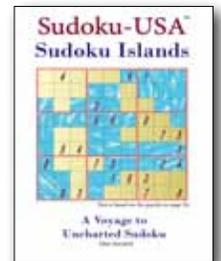

Have you been to Atlantis lately? Probably not, but if you can't make it there this season, why not try the 100+ puzzles in **Sudoku Atlantis**. The dozens of puzzle variations lead you through the story of the doomed island as it slips beneath the waves.

Trividoku puzzles combine trivia knowledge and Sudoku. A standard Trividoku has nine trivia matches – for example, if the topic of the puzzle was “State Capitals”, then you might match “Denver – Colorado”, “Sacramento – California” and so on. Each time you make a match you discover another digit to fill into the puzzle. You'll find our Summer Trividoku on page 4.

In Stars & Stripes puzzles we go beyond 1-9 to have twelve spaces in each row, column and 3x4 box. You'll need to fill each of these in with 1 – 9 as well as three ★s. Stars & Stripes puzzles are on page 8.

For **Sudoku Island** puzzles we start off with a regular 9 x 9 grid then put in four islands, each of which has nine spaces. So in addition to having 1-9 in each row, column and 3x3 box, the islands also have the digits 1-9.

A **Sudoku Earthquake** puzzle adds a “fault line” to the Sudoku puzzle. Below the puzzle we'll tell you all the digits that fit into the fault – it's up to you to figure out where they go.

You can find sample Island and Earthquake puzzles on the next page.

In the puzzle to the left, each set of nine island spaces

contains the digits 1-9.

Earthquake!

In the puzzle to the right, all of the digits along the fault line have been removed and placed in the box below.

In this puzzle you'll find nine players on the field, each with a uniform number from 1 to 9 (imagine that!)

But wait - there's not quite enough information to solve the puzzle unless you also work through some of the sports news below...

- The pitcher is two less than center field.
- One and nine are both in the outfield.
- First and third base are one apart from each other.
- The catcher is twice the shortstop.
- The right field is triple the third baseman.

Match each letter to a digit and fill the digit in the space containing that letter in the puzzle.

To get you started we've filled in one match for you.

Tweedle Dee and Tweedle Sum appear in the puzzle to the left.

Each pair of Tweedles adds up to nine.

In the puzzle to the right, Tweedle Dee and Tweedle Something add up to - something.

Each pair of Tweedles will add up to the same number; it's up to you to determine what that sum is.

Flower Power

Each of the flowers in these puzzles is fairly ordinary, so ordinary in fact that its value is in between the values to its left and right.

For example

6		4	1
---	---	---	---

3		7	8
---	---	---	---

	4	1						5
		8						
2	9					1	4

8	5	4				6

	4		9					
		5				3	1	
8		6	5		1			
2			4	5				3
6							8	
	5							

We've reflected the puzzle to the left into a rather curious mirror. Instead of giving a true mirror image, it changed all the digits and even changed which digits are shown.

The good news is that the digits changed consistently. For example, every "9" in the puzzle to the left turns into a "1" in the puzzle below.

I	H	G	F	E	D	C	B	A
3		1						
	4				5	1		8
